

Gifted Game Night – March 30, 2012
Hosted by Vicki Chapman and Cyndi Allen

The Gifted Game Night was an amazing success! We had over 39 families in attendance with a total of 146 people. This was a wonderful opportunity to bring the Gifted Community together to learn new things (technology, science, and writing), exercise, and socialize. The highlights of the evening were a robot that disarms explosives from the United States Air Force, technology integration with Darron Chapman, creating a Limited Edition Book with Donna Turner, construction engineering with Loan Tran.

I would like to extend thanks to Airmen, Ron White and Rob Sutton who are explosive ordnance disposal technicians that worked with children and adults for the evening. Trish Smith and Kelly Workman helped with parent correspondence, set up and clean up, and overseeing details at the event. I would also like to thank our three National Honor Society volunteers: Loan Tran, Anastasia Chakey, and McKayla Wilbanks. Another student to recognize is Mikhayla Dempsey, she attended all meetings to help organize the event and worked throughout the evening to make sure details were not overlooked. Thank you to WMS custodial staff as well, they worked hard to get the commons ready to go.

Thank you for supporting the Gifted Program in our district.
Vicki and Cyndi
